PHONE HOLDERS

S95** Series of phone and GPS holders

This range of phone and GPS holders comes in various sizes to cater for almost every device. Completely enclosed, with a sun visor and touch sensitive screen, these holders are water resistant and easily detachable with the patented latch mechanism. They come with a rain cover, safety strap and an opening in the base as a cable entry point. The default clamp mount will work with round or roundish bars from a diameter of 8mm up to 35mm.

S920* Smart Clip

Another patented product, the smart clip is incredibly easy to use and will keep holding onto a device under very high impact situations. Quick and convenient, your phone can be clipped or removed in a flash and will leave the camera lens free on most devices, while in use. Capable of clamping onto round or roundish bars from a diameter of 8mm up to 35mm. Available in medium or large.

OPTIONAL:

S951BKITR Replacement clamp and mounting kit for S95* or S290* holders

T519* Water resistant sleeve for use with S920*

UNIVERSAL ACCESSORY MOUNTS

S900A Smart Bar FITS: S95** S920*

Great for multiple devices, the S900A universal smart bar attaches **to the handlebar clamps** on bikes with top mount handlebars. Depending on the particular bike, it may mount simply by itself, or can be combined with a bike-specific mounting kit (eg **SKIT). See the My Motorcycle section of Givi's website to check if an SKIT is required.

S951KIT2 FITS: S95** S920*

The S951KIT2 mount is a short bar and bracket combination, designed to fit onto the **clutch perch or mirror mount**. Perfect for bikes with clip-on handlebars or accessory unfriendly cockpits, this is a great option for mounting your accessories.

FB**** FITS: S95** S920*

The bike-specific range of FB**** kits are designed to provide an accessory mount bar **behind the windshield** on many different models. A great solution which keeps your accessories clear of the dash board and handlebars.

S95** ALTERNATE MOUNTS

Givi has made a range of anodised aluminium mounts to work with the patented clip system on the S95** series of phone and GPS holders. Removing the need for the universal clamp which comes with the holder, these mounts are more robust, more attractive and a great solution for a more customised accessory.

S901A smart mount **FITS: S95****

This smart mount fits to the handlebar clamps on bikes with top mount handlebars. Depending on the particular bike, it may mount simply by itself, or when combined with one of the **SKIT bike specific mounting kits. Compatible with all S95* holders.

Ideal for: bikes with top mount handlebars

S902A universal bracket **FITS: S95****

This mount is designed to clamp onto round bars with a diameter between 11.5mm and 14mm. Perfect for the accessory bars now present behind the windshield on many large adventure bikes, or Givi's own FB**** bike specific kits to provide an accessory bar on bikes without them. Compatible with all S95* holders.

Ideal for: bikes with an accessory bar behind the windshield

S903A **FITS: S95**** **NEW: DUE SPRING 2019**

A brand new product from Givi, the S903A provides a mounting point for the S95** series of holders, fitted to the reservoir cap of the front brake. A range of **VKIT bike specific kits are available for easy installation on compatible models. Compatible with all S95* holders.

Ideal for: fitting to the reservoir cap of the front brake

STTR40 GPS specific mount **FITS: S95****

This is a dedicated mount for a Tom Tom Rider (40,42,400, 410, 420, 450, II) via the included Givi clamp mount, or can be combined with one of the different mount options above.

Ideal for: Tom Tom Rider GPS

Supplied clamp mount

Combined with S901A

SGZ39SM GPS specific mount **FITS: S95****

This is a dedicated mount to fit a Garmin Zumo (390LM, 590LM, 220LM, 350LM, 400LM, 450LM, 550LM, 340LM, 660LM, 345LM, 395LM, 595LM). To be combined with one of the different mount options for the S95** range of holders.

Ideal for: Garmin Zumo GPS

POWER CONNECTIONS

Givi has two different power solutions for your devices, comprising of a base Power Socket kit to be used with either the multi-port Power Hub or the single point Power Connection.

S110 Power Socket

S110 is the **base kit** for the two different power solutions from Givi. This kit connects directly to the battery, or to an ignition switched power supply, providing a fused power port for connecting the two different power supply options.

S111 Power Hub

This is a **multi-port power hub** designed to mount inside a tank bag and provide different power supply options for charging several devices at once (three USB ports with LED indicators and a single ISO port). Connecting to the S110 power socket, this kit includes a waterproof coupling to provide a secure entry point into your Givi tank bag.

S112 Power Connection

This is a **single point power** connection for your handlebar or smart bar mounted device. Connecting to the S110 power socket, it comes with four different adapters, covering most devices – Micro USB, Mini USB, iPhone 30 pin and iPhone lightning.
