PHONE HOLDERS

S95** series of phone and GPS holders

This range of phone and GPS holders comes in various sizes to cater for almost every device. Completely enclosed, with a sun visor and touch sensitive screen, these holders are water resistant and easily detachable with the patented latch mechanism. They come with a rain cover, safety strap and an opening in the base as a cable entry point. The default clamp mount will work with round or roundish bars from a diameter of 8mm up to 35mm.

S920 Smart Clip

The smart clip is incredibly easy to use and will keep holding onto a device under very high impact situations, perfect for touring or adventure riding. Quick and convenient, your phone can be clipped or removed in a flash and will leave the camera lens free on most devices, while in use. Capable of clamping onto round or roundish bars from a diameter of 8mm up to 35mm. Available in medium or large.

Also available, T519 water resistant sleeve (sold separately)

S921 Easy Clip

Aimed at commuters, this easy to use mount holds most devices from 52 to 85mm wide and is designed for recording on the go, leaving the camera unobstructed. High-quality materials ensure durability and extra grip. Comes with a webbed safety strap for use on bumpy terrain.

Note the mounting bracket is sold separately on the S921. Can be paired with S901A, S902A, S903A, S904B or S95KIT. If you already have a Givi S95** series phone holder, then S921 will mount directly to that holder.

UNIVERSAL ACCESSORY BAR MOUNTS

S900A Smart Bar FITS: S95** S920 S921 (with S95KIT)

Great for multiple devices, the S900A universal smart bar attaches to the handlebar clamps on bikes with top mount handlebars. Depending on the particular bike, it may mount simply by itself, or can be combined with a bike-specific mounting kit (eg **SKIT). See the My Motorcycle section of Givi's website to check if an SKIT is required.

S951KIT2 FITS: S95** S920 S921 (with S95KIT)

The S951KIT2 mount is a short bar and bracket combination, designed to fit onto the clutch perch or mirror mount. Perfect for bikes with clip-on handlebars or accessory unfriendly cockpits, this is a great option for mounting your accessories.

FB**** FITS: S95** S920 S921 (with S95KIT)

The bike-specific range of FB**** kits are designed to provide an accessory mount bar behind the windshield on many different models. A great solution which keeps your accessories clear of the dash board and handlebars.

ALTERNATE MOUNTS

Removing the need for the universal clamp which comes with some holders, these mounts are more robust, more attractive and a great solution for a more customised accessory.

S901A smart mount

FITS: S95** S921

This smart mount fits to the handlebar clamps on bikes with top mount handlebars. Depending on the particular bike, it may mount simply by itself, or when combined with one of the **SKIT bike specific mounting kits.

Ideal for: bikes with top mount handlebars

S902A universal bracket

FITS: S95** S921

This mount is designed to clamp onto round bars with a diameter between 11.5mm and 14mm. Perfect for the accessory bars now present behind the windshield on many large adventure bikes, or Givi's own FB**** bike specific kits to provide an accessory bar on bikes without them.

Ideal for: bikes with an accessory bar behind the windshield

S903A reservoir cap mount

FITS: S95** S921

Great looking bracket that provides a mounting point for the S95** and S921 series of holders, fitted to the reservoir cap of the front brake. A range of **VKIT bike specific kits are available for easy installation on compatible models.

Ideal for: fitting to the reservoir cap of the front brake

S904B reservoir cap mount

FITS: S95** S920 S921

A lower-cost alternative to the S903A, the aluminium and technopolymer mount is fitted to the reservoir cap of the brake or clutch. Compatible with the S95** and S921 holders, the swivel piece can also be removed and the S920 Smart Clip fitted in its place. A range of **VKIT bike specific kits are available for easy installation on compatible models.

Ideal for: fitting to the reservoir cap of the front brake

S95KIT

Mounting kit for S921 holders, or replacement clamp for S95** and S920

MOTORCYCLE GPS MOUNTS

STTR40 GPS specific mount

This is a dedicated mount for a Tom Tom Rider (40,42,400, 410, 420, 450, 500, 50, II). It attaches to the handlebar, or any similar location via the Givi clamp mount included, or can be combined with any of the mount options on the previous pages.

Ideal for: Tom Tom Rider GPS

SGZ39SM GPS specific mount

This is a dedicated mount to fit a Garmin Zumo (345LM, 346LM, 390LM, 395LM, 396LM, 590LM, 595LM, 220LM, 350LM, 400LM, 450LM, 550LM, 340LM, 660LM, 595LM). Note, this mount does not come with its own clamp, so must be paired with either S901A, S902A, S903A, S904B or S95KIT. If you already have a Givi S95** series phone holder, then SGZ39SM will mount directly to that holder.

Ideal for: Garmin Zumo GPS

POWER CONNECTIONS

Keep your devices powered while on the go. Givi offers a base Power Socket kit, which can be used with either the multi-port Power Hub or the single point Power Connection.

S110 Power Socket

S110 is the base kit and that connects directly to the battery, or to an ignition switched power supply, providing a fused power port for connecting the S111 power hub.

S111 Power Hub

This is a **multi-port power hub** that mounts inside a tank bag to provide power supply options for charging several devices at once (three USB ports with LED indicators and a single ISO port). Connects to the S110 power socket. Includes a waterproof coupling to provide a secure entry point into your Givi tank bag.

PLUS

S112-1 Power Connection

This is a **single point power connection**. Connects to the S110 power socket, it comes with four different adaptors: micro USB, mini USB, iPhone 30 pin and iPhone lightning.

**If you have any questions,
please call, we're happy to help.**
